**Subject: M/035/0002 – Bingham Canyon Mine
Notice of Activity – Lark Parking Facility**

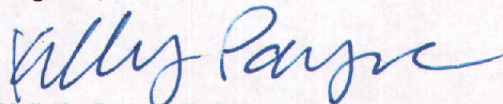

Dear Mr. Baker:

Kennecott Utah Copper LLC (KUC) is installing additional parking facilities at the Bingham Canyon Mine south of the existing Lark Gate as depicted in the attached location map. The parking facility will disturb approximately 45 acres of ground in order to build a 900-stall paved parking lot for mine employees. The facility will include the modification of the vehicle entry-exit gates intersecting U-111, a new bus access road from the existing Lark Gate mine access road to the new parking lot (which will include associated curb, gutter, and walkways), and a stormwater collection and management system including an oil-water separator.

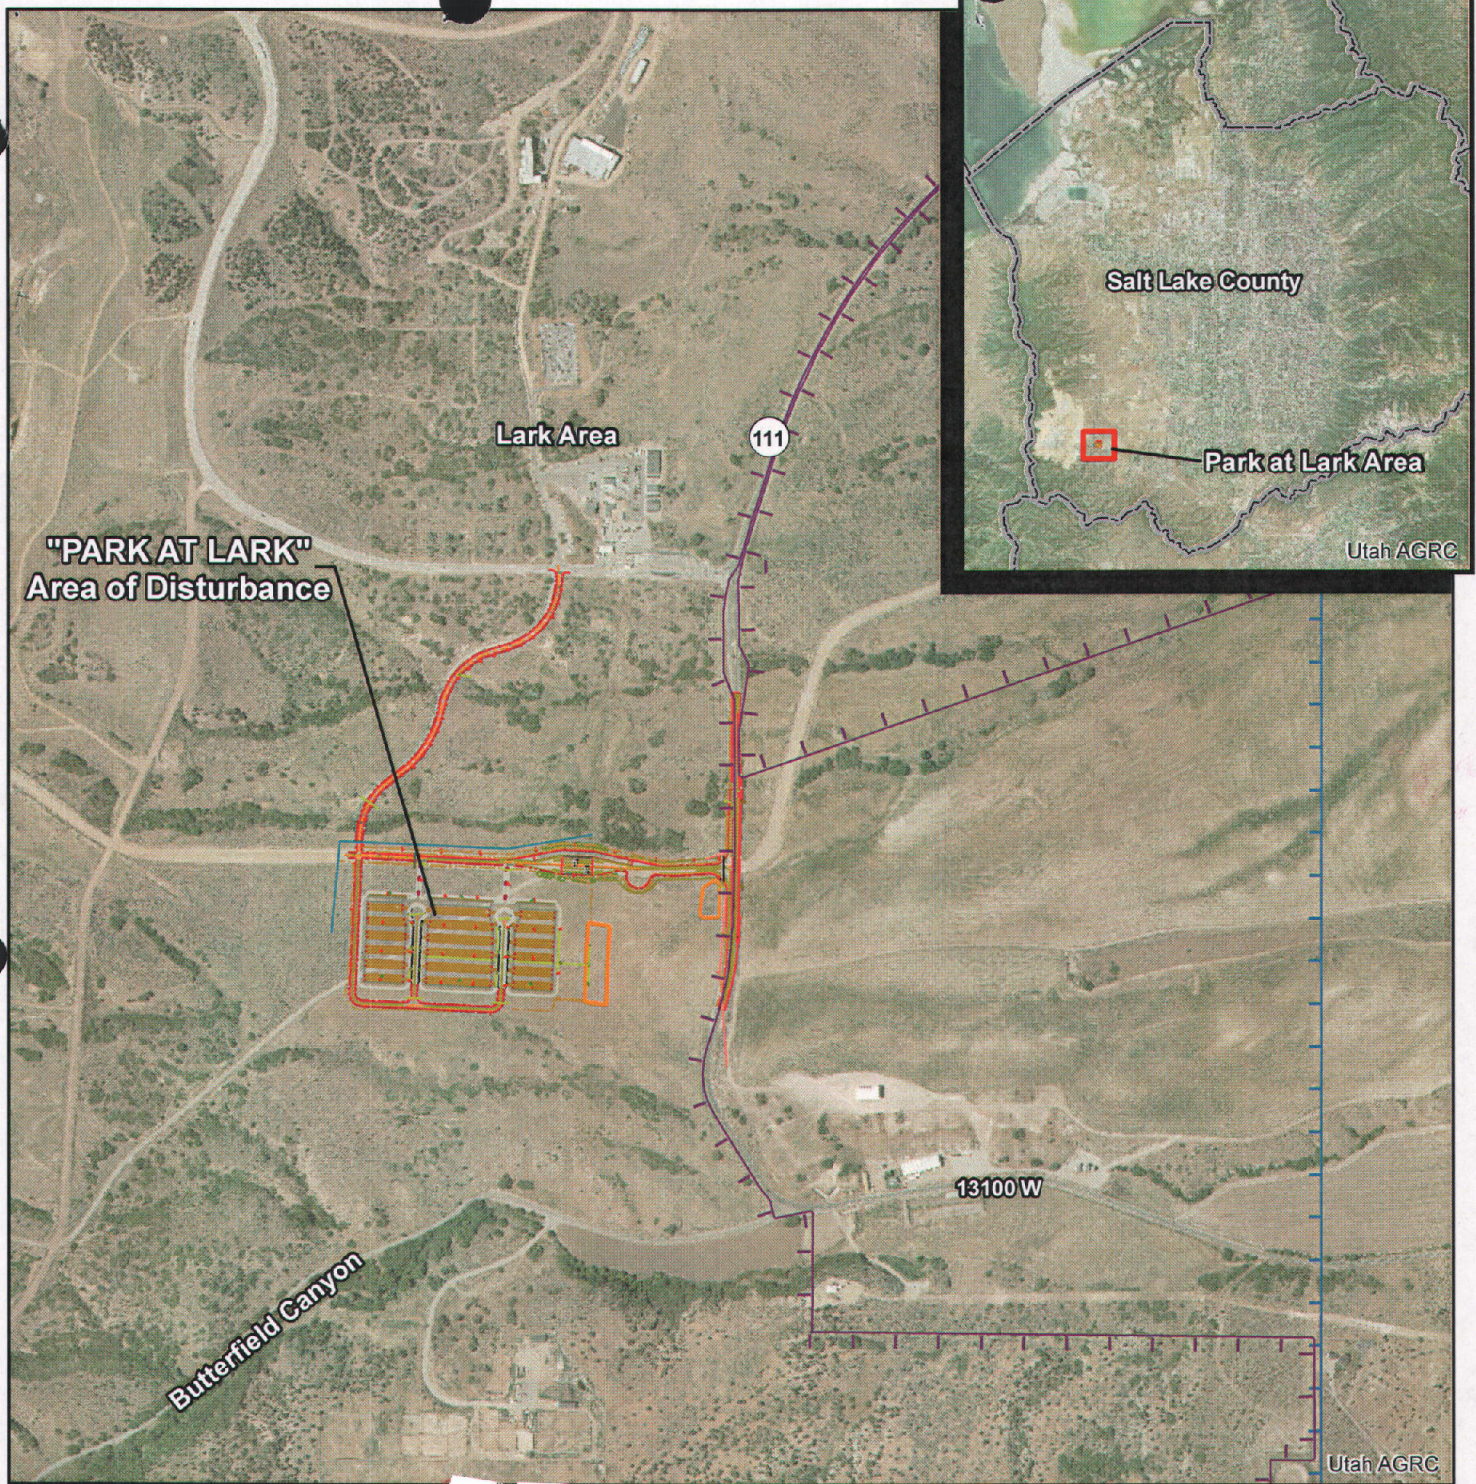

KUC completed a Class III Cultural Resources Inventory as well as a Natural Resources Inventory which included a raptor survey in 2011 for this area. No cultural or natural resources were identified within the project area. The project site is largely within a previously disturbed footprint (dry land farm area, roadways, and grassy areas on previous disturbance). KUC believes that there is little value in salvaging the upper growth media horizon in this location and that the site be readily amenable to direct revegetation when the parking area is ultimately removed.

Please contact Trevor Heaton (801-563-1514) should you have any questions concerning this submittal.

Regards,

Kelly L. Payne, P.G.
